Hello Michael Joelson,

The CMSD Standardized Curriculum is not a stand alone program. That is why we also have an extra Curriculum System. This system compliments and equally addresses state standards. Therefore, as the principal I am in constant pursuit for additional support.

I am pleased to have once again the Chess for Success Program. This will be the seventh year of enhancing the teaching and learning environment. It is a program like yours that addresses cognitive thinking, logic and reasoning. Therefore, I would strongly recommend extending the program in more school throughout the district.
